

Evidence

Story Context

After entering the haunted house, the sheriff finds a **damaged evidence file** and a **camera image** recovered from the scene.

A missing witness left behind a clue... but something feels off.

Objective

Find the hidden flag inside the provided evidence files.

Files Given

Description.txt

Evidence.png

Step 1 — Read the Description

cat Description.txt

You'll see something like:

I saw the boy enter the house...
maybe the image knows more than I do...

Hint: The image contains something hidden.

Step 2 — Check Metadata (First Trap)

exiftool Evidence.png

Output:

Comment : THM{ghost_is_real}

Artist : THM{you_found_me}

These are **fake flags (decoys)**

Step 3 — Don't Trust Easy Flags

At this point:

- Flags look valid
- But challenge feels too easy

In CTFs: **easy flag = usually fake**

Step 4 — Look Deeper (Strings)

strings Evidence.png | less

You may notice:

- Random binary data
 - Possible zip hints
-

Step 5 — Use Binwalk (Key Step)

binwalk Evidence.png

Output:

Zip archive data, encrypted

This confirms:

Something is hidden inside the image

Step 6 — Extract Hidden Data

```
binwalk -e Evidence.png
cd _Evidence.png.extracted
ls
```

You'll find:

438898.zip

Step 7 — Extract ZIP (Password Protected)

unzip 438898.zip

👉 Enter password:

shadowwalls

🧠 Password clue comes from:

THEY ARE IN THE WALLS

Step 8 — Get the Real Flag

```
cat real_flag.txt
```

✓ Final flag:

THM{a9F3xWv_93jfKslQ0xZpLwR8nVbYtD2m}
